

MAHMUDUL HASAN

Full-Stack Developer · JavaScript · TypeScript · React.js · Node.js · MongoDB
(+880) 130-260-9245 · mhasan.bd.95@gmail.com · [GitHub](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Full-Stack Developer with 2+ years of experience building end-to-end MERN applications — from REST API design and JWT authentication to complex React.js frontends. Served as founding frontend engineer at an EdTech startup, owning 70–80% of the initial product. Demonstrated full-stack capability through independently architected projects featuring real-time features, RBAC, and scalable backend systems. Fiverr Level 1 Seller with a 5-star rating and 100% on-time delivery.

PROFESSIONAL EXPERIENCE

Front-End Developer | *Pure Block Pvt. · Remote (EdTech Startup)*

Sep 2023 – Mar 2025

- **Founding frontend engineer** — built **70–80% of the initial product** including all core UI components, page layouts, and API integrations using React.js and React Query.
- **Refactored the entire codebase** — eliminated deep prop-drilling and introduced **Redux Toolkit**, transforming ad-hoc code into a scalable, reusable component library.
- **Integrated AI-powered assignment review** that automatically evaluated student submissions and returned structured instructor feedback via third-party API.
- Shipped complex UI features: **floating comment annotations** beside a rich-text editor, a **drag-and-drop file manager** with reordering, and a **student portfolio builder**.

Freelance Full-Stack Developer | *Self-Employed · Fiverr*

Jan 2023 – Present

- Achieved **Fiverr Level 1 Seller** status with a **5-star rating** and **100% on-time delivery** — building and deploying complete MERN stack applications for international clients.
- Independently handled full project lifecycles: database schema design, REST API development, React frontend, and cloud deployment on Vercel and Render.

KEY PROJECTS

Real-Time Chat & Social App — *Next.js · TypeScript · React Query · Express.js · MongoDB · Socket.io · JWT* [Live](#) - [Frontend](#) - [Backend](#)

- Designed and built a **fully decoupled full-stack architecture** — Next.js/TypeScript frontend consuming a separate Express.js REST API with MongoDB, demonstrating production-level project structure.
- Implemented **real-time messaging** with Socket.io, JWT-based auth with protected routes, and a complete social graph — posts, comments, likes, and friend requests. · *In Active Development*

MERN E-Commerce Platform — *Next.js · Node.js · Express.js · MongoDB · Redux Toolkit* [Live](#) - [Video](#) - [Frontend](#) - [Backend](#)

- Built a **complete e-commerce backend** with Node.js/Express.js — RESTful API covering auth, product management, orders, and cart — with a normalized MongoDB schema using Mongoose ODM.
- Integrated **Next.js SSR/SSG** on the frontend with Redux Toolkit state management and **RBAC** separating admin and user roles across a real-time dashboard.

TECHNICAL SKILLS

Frontend: React.js, Next.js (SSR/SSG/ISR), JavaScript, TypeScript, Redux Toolkit, React Query, Tailwind CSS

Backend: Node.js, Express.js, FastApi, REST API Design, JWT Authentication, RBAC, Socket.io

Database & Tools: MongoDB, Mongoose ODM, Docker, Git, GitHub, Vite, Vercel, Render

EDUCATION

Bachelor of Business Administration (BBA) | *Northern University Bangladesh*

Jan 2014 – Dec 2017
